

How to Fix Green/Black Screen on Google Meet

1. Open Chrome browser.
2. Type **chrome://flags** in the address bar.
3. In the search bar at the top, type in "**Hardware-accelerated video decode**".
4. Select "**Disabled**" from the drop-down to the right of "**Hardware-accelerated video decode**".
5. Click on "**Restart**" in the bottom right corner to restart Chrome.
